

# Health Shield

A simple, fast and affordable device to detect fevers and govern face mask protection for public safety.

## OUR FIRST LINE OF DEFENSE, POWERED BY TEVANO.

To help ensure our public's safety from the spread of infectious disease, it's essential to detect when visitors, customers and employees have a fever.

Driven by AI, intelligent analytics and custom automation, Health Shield from Tevano is a turn-key, easy-to-set up and affordable screen platform that employs state of the art thermal fever detection, even while wearing a face mask.

Health Shield is the first enterprise-ready, contactless fever-inspection station, with options to customize, audit and optimize the system for your needs – all from one central dashboard.

*This is the innovation that will shield our health, in real time from the moment you take it out of the box.*

## INSTANTLY DETECT FEVER & ENSURE FACE MASK PROTOCOLS ARE MET PRIVACY FRIENDLY + INSTANT ALERTS + DATA DRIVEN

- Measures temperature with near-perfect accuracy
- Ensures face masks are worn — advises to do so

THE POWER TO PROTECT OUR  
HEALTH AT YOUR FINGERTIPS

### One Powerful Platform

Unlimited stations, locations & workflows

### Flexible Options

Choose from a single stand-alone solution or networked stations integrated with digital signage or website.

Actual core body temperatures should be further confirmed using clinical measurement devices. Use thermographic cameras in accordance with local laws and regulations. Statements regarding temperature device have not been evaluated by the FDA and are not intended to diagnose, treat, cure, or prevent any disease or health condition.
